Health care providers, health plans, health care clearinghouses and their business associates (Covered Entities) face new imperatives to review and tighten their practices to ensure their practices comply with recently released guidance from the U.S. Department of Health & Human Services Office of Civil Rights (OCR) emphasizing and clarifying the responsibilities of health care providers, health plans and the healthcare clearinghouses under the Health Insurance Portability & Accountability Act of 1996 (HIPAA) to provide access to individuals that are the subject of protected health information or "PHI" to access or copies of their PHI in accordance with HIPAA's rules and other recent HIPAA guidance and enforcement. With OCR's recent release of added guidance and OCR enforcement statistics continuing to show HIPAA access rule violations among the most common HIPAA violations and OCR stepping up HIPAA enforcement, health care providers, health plans, healthcare clearinghouses can expect heightened scrutiny and enforcement of these requirements. Additionally, Covered Entities also should evaluate the adequacy of their other practices in light of other recent OCR guidance and enforcement actions.
