We look forward to your participation!

About The Study Group Discussion Topic

Paul Demuro and Cynthia Marcotte Stamer will lead conceptual discussion of the ownership, control, storage, use, protection and commercialization of personal health care and other personal data by life sciences and health care organizations across borders considering selected U.S. and other Global privacy laws such as:

- U.S laws such as the US Privacy Act of 1974, the Health Insurance Portability and Accountability Act (HIPAA); the Genetic Information Nondiscrimination Act, the Fair and Accurate Credit Transactions Act, Internal Revenue Code, the Social Security Act; ERISA, the Fair Credit Reporting Act, the California Consumer Privacy Act of 2019 and other state privacy, data security and data breach laws;
- The General Data Protection Regulation (GDPR) of 2016; and
- Other selected existing and proposed global privacy laws.

The discussion will focus on developing a basic framework and appreciation for the practical concerns and challenges that these and other existing and emerging domestic and international laws and policies are likely to present to life sciences and health care companies operating or dealing with data across borders.

About Discussion Leaders

Paul R. DeMuro, Ph.D. is a practicing attorney and former National Library of Medicine post-doctoral fellow He obtained his Ph.D. in Biomedical Informatics at Oregon Health & Science University School of Medicine, where his research area was the use of information technologies to increase quality and reduce costs. He also worked with data analytics in the context of various disease states. He practices law in the areas of corporate transactions, accountable care organizations, clinical integration, data analytics, biomedical informatics, cyber security, healthcare antitrust associated with innovative structures and ventures, value-based purchasing, joint ventures, mergers and acquisitions, governance, finance, and regulatory compliance. He is also well-versed in Medicare reimbursement, compliance and managed care. He has authored or co-authored more than 175 publications and has delivered more than 400 presentations around the world.
